

Press release

The Susanne Kaufmann™ hand care line is being expanded by two new and effective products: The **Susanne Kaufmann™ Hand Peel rejuvenating** and the **Susanne Kaufmann™ Hand Serum rejuvenating** have been formulated to provide expert care for the especially sensitive and delicate skin on our hands, to repair and to make the skin look radiant. With a powerful spectrum of natural, botanical active ingredients the new products are the perfect complement to holistic, natural skin and body care.

The new **Susanne Kaufmann™ Hand Peel rejuvenating** is a gentle, mechanical peeling that repairs the skin and stimulates the regeneration of skin cells. The formulation contains Biogomm'age – functional peeling particles consisting of highly concentrated vitamin E in a cellulose casing. These particles function like sensors and dissolve as soon as a certain temperature is reached through the peeling process. This way the skin is protected from excessive irritation. The hand peeling also contains vitamin B, which has a soothing and rejuvenating effect. The cell renewal is stimulated and the skin's protective function is improved.

Key Ingredients:

- **Biogomm'age** is a natural, mechanical skin exfoliant consisting of highly concentrated vitamin E incased in a cellulose shell made from plants.
- **Vitamin B** has a smoothing effect, counteracts skin irritation and promoted cell regeneration.
- **Ultramarine** is the color of the lapis lazuli. It is a blue, mineral color pigment which we used in this product. But there is also another healing background of this stone. Lapis lazuli contributes to an opening of the mind and is also associated with the truth and the willingness to solve conflicts.

Application: Massage the product in several times a week on dry hands. After the particles have dissolved, rinse with lukewarm water and then apply the Susanne Kaufmann™ Hand Serum rejuvenating.

Ingredients:

caprylic/capric triglyceride, schinziophyton rautanenii (manketti tree) kernel oil, helianthus annuus (sun flower) oil, glycerin, prunus dulcis (sweet almond oil), olea europaea (olive) fruit oil, butyrospermum parkii (shea butter), polyglyceryl-5 oleate, tocopherol, cellulose, tocopheryl acetate, ultramarine, octyldodecanol, echium plantagineum seed oil, cardiospermum halicacabum extract, aqua purificata (water), cera alba (beeswax), bisabolol*, parfum (fragrance from natural scents).

The preservation and emulsification take place on a plant-based foundation.

Press release

The **Susanne Kaufmann™ Hand Serum rejuvenating** smooths, repairs, regenerates and rejuvenates the skin with active ingredients. It contains the innovative CUBE³-hyaluronic acid complex, which provides intensively moisturizing care, antioxidants, and the coenzyme Q10, which stimulates the elastic structures of the skin and helps lighten pigmentation spots. The skin appears smooth and even and looks rejuvenated. The intelligent combination helps to strengthen the skin structure and fight against signs of aging and environmental pollution.

Key Ingredients:

- **CUBE³** is a patented complex of herbal hyaluronic acids that contains three different sizes of molecules, which can act on the skin surface as well as in the deeper layers of the skin. Furthermore, it serves as an enhancer of other active ingredients.
- **Vitamin C** supports the collagen synthesis and protects the skin from environmental influences.
- **Rovisome Q10**, a powerful antioxidant that helps prevent free radical damage and helps to stabilize the skin and reduce wrinkles.

Application: Depending on your needs, the serum can be applied and massaged in several times a day - **either after the use of the Susanne Kaufmann™ Hand Peel rejuvenating or as a specialized care.**

Tip: After applying a thick layer of hand serum slip into some cotton gloves. The heat helps to absorb the active ingredients more deeply.

Ingredients:

aqua purificta (water), caprylyl caprylate/caprata (proposal), squalene, pentylene glycol nat., echium plantagineum seed oil, helianthus annuus (sunflower) seed oil, cardiospermum halicacabum extract, lupinus albus seed extract, alcohol (plant), lecithin, ubiquinone hyaluronate, potassium phosphate, sodium stearyl glutamate, glycerin, dioscorea villosa (wild yam) root extract, glycine soja (soybean) sterols, olea europaea (olive) leaf extract, sodium hyaluronate, schinziophyton rautanenii kernel oil, xanthan gum, tocopherol, saccharide isomerate, citric acid, sodium citrate, cetearyl alcohol, glyceryl stearate citrate, octyldodecanol, oleyl alcohol, bisabolol, parfum (fragrance from natural scents).

The preservation and emulsification take place on a plant-based foundation.
